TRAFFIC DATA IS NOW AVAILABLE ON THE NHDOT WEBSITE

The New Hampshire Department of Transportation announces a new feature, "Traffic Data", has been added to the agency's Internet website, www.nhdot.com.

Engineers, developers, realtors, researchers, the media, students and the general public often seek traffic data provided by the State of New Hampshire for a variety of uses. In order to make the traffic data easier to obtain and the Internet pages more user-friendly, the new Traffic Data feature has interactive maps as well as alphabetical listings of the New Hampshire towns.

The Traffic Data feature includes:

- A listing of terms and meanings used throughout the pages.
- Interactive maps that bring the user to either other maps or traffic volume data reports.
- A downloadable Traffic Volume Report book
- Monthly Automatic Traffic Reports

To access the new NHDOT Traffic Data component from your browser, simply enter www.nhdot.com, and go to the "Business Center". Then select one of the two links under "Traffic Data".
